SUMMARY

Junior Full Stack Developer with hands-on experience building and deploying responsive web applications using React.js, Node.js, Express.js and MongoDB. Experienced in developing REST APIs, implementing JWT-based authentication, integrating third-party APIs and testing endpoints with Postman. Completed a Web Developer Internship and built multiple full-stack projects using Git and GitHub.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Frontend: HTML5, CSS3, Bootstrap, React.js

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Netlify, Render

EXPERIENCE

Web Developer Intern

Jaran Technology Services

Dec 2024 – Apr 2025

Madurai

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Integrated a MySQL database and tested REST API endpoints using Postman.
- Assisted in delivering Core Java and OOP training by preparing coding exercises and learning materials.

PROJECTS

DocPilot AI - Prototype Document Assistant

GitHub — Live Demo

Jun 2026 – Jul 2026

MERN Stack

- Developed a prototype document assistant using the MERN Stack with JWT authentication and protected routes.
- Implemented user authentication, subscription management, and REST APIs using Node.js, Express.js, and MongoDB.
- Designed a responsive React dashboard using Bootstrap and Axios with frontend-backend integration.
- Built a document upload interface with file validation and user-friendly workflows.
- Deployed the frontend on Netlify and backend services on Render.

Wristify

In Progress

Jul 2026 – Present

MERN Stack

- Developing a full-stack e-commerce application using MongoDB, Express.js, React.js and Node.js.
- Implementing product management, product search, shopping-cart functionality and secure user authentication using JWT.
- Building responsive React.js interfaces and integrating them with Express REST APIs backend by MongoDB.

FrostCast Weather

GitHub — Live Demo

May 2026

React.js

- Developed a responsive weather application using React.js and integrated the actual weather API used.
- Implemented asynchronous API calls to display current weather, 24-hour forecasts, temperature, humidity and wind details.
- Handled loading and error states and deployed the application on Netlify.

EDUCATION

K.L.N. Arts and Sciences College

B.Sc. in Computer Science

Madurai

2020 - 2023

St. Joseph Girl's Higher Secondary School

HSC

Madurai

2019 - 2020

CERTIFICATIONS

- Java Workshop Certification -Codelo — 2025
- Full Stack Development - MERN Stack — Simplar Academy — 2026
